education

B.Sc. Computer Science
Web Technology
Universiti Tun Hussein Onn Malaysia

profile

Independent developer with **5+ years of production experience** across web, mobile, and backend systems. Delivered projects in Web3 infrastructure, fintech, healthcare, and retail, usually as **sole developer owning architecture through deployment**. Built a Telegram notification service that grew to **7,000+ users** from scratch. Remote-first and async-comfortable.

experience

~/work/infutro — CONTRACT BACKEND DEVELOPER

Infutro Enterprise
nov 2025 – present

- Built and maintained backend infrastructure for a **Web3 analytics platform** spanning multiple blockchain networks.
- Implemented **DEX protocol integrations** and decentralized exchange adapters.
- Fully remote, async delivery, self-managing technical decisions end-to-end.

~/work/ai-finance-app — CONTRACT FULL-STACK DEVELOPER

AI Finance App
jan – jun 2024

- Sole developer on a full-stack PWA using **evolutionary algorithms** to generate personalised financial investment advice.
- Owned React frontend, Node/Express backend, and production deployment independently.

~/work/asiapactalents — PART-TIME DEVELOPER

AsiaPacTalents
mar – jul 2023

- Built multiple internal full-stack web applications **still in active daily use**.
- Delivered directly to production with minimal supervision.

~/work/nutrition-healthcare — FREELANCE DEVELOPER

Nutrition & Healthcare System
nov – dec 2022

- Android app for patient health tracking and nutritionist appointments (Kotlin + Android Studio).

~/work/scan-and-go — FREELANCE DEVELOPER

Scan & Go
apr – may 2022

- Cross-platform retail app for in-store product scanning and virtual cart management (React Native + Expo).

~/projects/causeway-vtl-notifier — FOUNDER

Causeway VTL Ticket Notifier `7,000+ users`
jan – may 2022

- Real-time web scraper monitoring Causeway Link ticket availability with instant Telegram alerts.
- Grew to **7,000+ active users organically** with zero marketing spend.
