Edmund Lim Zee Enn

Full-Stack Developer

edmundlzen@gmail.com | +60 16-7921666 | github.com/edmundlzen | edmundlzen.dev

PROFILE

Independent developer with **5+ years of production experience** across web, mobile, and backend systems. Delivered projects in Web3 infrastructure, fintech, healthcare, and retail, usually as **sole developer owning architecture through deployment**. Built a Telegram notification service that grew to **7,000+ users** from scratch. Remote-first and async-comfortable.

EXPERIENCE

Infutro Enterprise

Nov 2025 – Present

Contract Backend Developer

- Built and maintained backend infrastructure for a **Web3 analytics platform** spanning multiple blockchain networks.
- Implemented **DEX protocol integrations** and decentralized exchange adapters.
- Fully remote, async delivery, self-managing technical decisions end-to-end.

AI Finance App

Jan – Jun 2024

Contract Full-Stack Developer

- Sole developer on a full-stack PWA using **evolutionary algorithms** to generate personalised financial investment advice.
- Owned React frontend, Node/Express backend, and production deployment independently.

AsiaPacTalents

Mar – Jul 2023

Part-Time Developer

- Built multiple internal full-stack web applications **still in active daily use**.

Nutrition & Healthcare Management System

Nov – Dec 2022

Freelance Developer

- Android app for patient health tracking and nutritionist appointment management (Kotlin + Android Studio).

Scan & Go

Apr – May 2022

Freelance Developer

- Cross-platform retail app for in-store product scanning and virtual cart management (React Native + Expo).

Causeway VTL Ticket Notifier

Jan – May 2022

Founder

- Real-time web scraper monitoring Causeway Link ticket availability with instant Telegram alerts.
- Grew to **7,000+ active users organically** with zero marketing spend.
