Edmund Lim Zee Enn

Backend & Full-Stack Developer · Johor, Malaysia (GMT+8)

edmundlzen@gmail.com | +60 16-7921666 | github.com/edmundlzen | linkedin.com/in/edmundlzen | edmundlzen.dev

PROFILE

Developer shipping production software since 2020, usually as the **sole developer owning architecture through deployment**. Built a Telegram ticket service that grew to **7,000+ users**. Studying Computer Science at UTHM; open to **remote part-time and contract roles**, working async.

EXPERIENCE

Infutro Enterprise
Nov 2025 – Present

Contract Full-Stack Developer · Remote

- **Solo developer** on a Web3 analytics platform, handling **frontend and backend** from design to deployment.
- Built the pipeline that reads, decodes and stores on-chain data across **6 EVM and non-EVM chains**: Ethereum, BNB Chain, Polygon, Arbitrum, Solana and Hyperliquid.
- Implemented DEX protocol adapters for **Uniswap** and **PancakeSwap**.

AI Finance App
Jan – Jun 2024

Contract Full-Stack Developer

- Sole developer of a PWA that uses **evolutionary algorithms** to generate personalised investment advice.
- Built the React frontend and Node.js/Express backend, and ran production deployment.

AsiaPacTalents
Mar – Jul 2023

Part-Time Developer

- Built an internal **form builder** and form tools with Google Sheets integration and automated workflows, **still in daily use**.

Freelance Developer
Apr – Dec 2022

- Healthcare Android app (Kotlin) and a retail scan-and-checkout app (React Native, Expo).

PROJECTS

Algorithmic Futures Trading System · ML research and live execution across futures markets — Ongoing

- Python research and live-trading system: **LightGBM** models, walk-forward backtesting, **270+ test files**.
- Custom **C# NinjaTrader add-on** bridged to Python over WebSockets, with a FastAPI control console.

UTHM Ride · campus ride-hailing Telegram Mini App — 2026

- Real-time rider–driver bidding built on **Next.js** and **Supabase Realtime**.

Taro · AI tarot bot on Telegram — 2026

- Paid Node.js bot that took **real payments via Billplz** (FPX, Touch 'n Go, DuitNow).

Causeway VTL Ticket Notifier · Founder — Jan – May 2022

- Python service posting new cross-border bus tickets to Telegram in real time; grew to **7,000+ users** organically.

SKILLS
